*unable to complete screen, under care, absent for re-screen

**children in self contained classrooms or those who spend less than half of the school day in a mainstreamed classroom

DCH-0604 Quarterly Hearing Screening Report Batch Sheet Instructions

Passed - Any child who passes the preliminary screening in Stage I or the threshold sweep or audiogram in Stage II.

Referred - Any child screened in Stage II who does not pass the audiogram, resulting in a medical referral.

The ***Other*** category should include children who are:

1. ***Under care*** - Children who have known sensorineural hearing losses who have been seen within the last year should be counted in this category. In addition, children who are currently taking medication (for otitis media, middle ear effusion or related problems) or who are scheduled to see their physician within 6-8 weeks regarding an ear problem should be considered Under Care.
2. ***Absent for re-screen*** - Any child who is absent for re-screen should be counted in the Other category. If he/she is screened at a later date at the health department, in school or at an otology clinic, that child should not be counted a second time. We don't want to count any child twice.
1. ***UTS (unable to screen)***- If a screening is attempted but is unsuccessful you should account for your time. An attempt is considered to be time spent conditioning and/or screening *without* completing the task. If you are able to screen this child at a later date and are successful, he/she should not be counted a second time.

of Children Seen by a Physician - Any child who has received treatment from an ENT, pediatrician or family physician. Information may come from the parent, doctor, teacher or child (if he/she is old enough to report). Document in the current quarter, regardless of whether treatment was provided in a different quarter. We will use this as an average over several years.
